SEGA SETS THE PACE FOR 1994!

This is going to be a very good year for Sega. Why? Because they dominated the Winter CES! Not only did they have a whole slew of great games ready for the first six months of the year, but they also were talking about a lot of great projects they have in store for the future like Saturn, modular cartridges and a whole new generation of CD software. And their archrival Nintendo? Promises, promises and more promises. I have to give the Big N credit, though—Super Metroid was the game of the show, but beyond that, Nintendo really didn't have much that was really exceptional.

Here's my read on the ongoing Sega vs. Nintendo battle that

continued at this CES:

New machines: Sega's Saturn wasn't at the show. Sega did run a video tape that talked about Saturn and showed a few of the work-inprogress game screens. What we could see were near-perfect arcade clones of Daytona, Virtua Racing and Virtua Fighters. It looked very impressive! Nintendo had monitors set up that ran demonstrations of unbelievably realistic 3-D polygon scenes. They easily blew away what Sega was showing. The only problem was that these images were being generated by a jillion dollar CG work station underneath the table skirts (see pix in Interface column). Oops!

Systems sold to date: There has always been an ongoing battle between Nintendo and Sega as to who was number one. Each company would publish different numbers and there was no way to find out who was correct. That was, until now. There is a tracking service called TRSTS (Toy Retail Sales Tracking Service) and they provide a nationwide unbiased accounting of sales in the video game industry. During the all-important Christmas shopping month of November, TRSTS reports that Sega sold 63 percent of all the 16-Bit video game systems.

Consumer Friendliness: For lack of a better name, Sega is aware that games are getting very expensive. Now that FX and SVP chips are being added to carts, 16-Bit games will soon approach the \$100 mark. Sega is doing something about it. It's all very simple; sell a mini-cart with the SVP chip on it and the new games on plug-in boards. Smart, very smart. Not only for the consumer, but also for the third-party licensees who don't have to raise the game costs to cover the special chips. Taking notes Nintendo?

There's more, like the game ratings. Looks like Sega read my January editorial about making their game ratings more visible. And boy were they! Every game at CES and each plece of literature had their game rating prominently displayed. Good job, Sega. Now if only we can get the other game mags to do the same.

Now, about Saturn? How about showing it at June CES and bringing it out in November?

LETTER OF THE MONTH

3DO UPDATE

I have been thinking about buying a 3DO system, but it is just too hard to rationalize shelling out \$700 for the system. Has there been any more news about the Sanyo and AT&T versions of the system? Perhaps with a little competition, the price may drop to a reasonable level.

David Shane Phoenix, AZ

Sanyo U.S. states that it's 3DO has been put on hold until sales pick up!

(Ed. Well Dave, there seems to be several different opinions as to the status of the Sanyo and AT&T systems. After we ran the article in last month's column about Sanyo and AT&T backing off on producing their own systems, people at Panasonic and 3DO were quick to say that it wasn't true and they asked for a retraction. In fact Mr. Patrick Barrett of Panasonic's Midwest Office even sent us photocopies of the articles that ran in some of the techie publications. These articles, it should be noted, just regurgitated Trip Hawkins flowery "State of the Union" speech that he made about the 3DO at the Winter CES.

First of all, we have to say that our information came from articles that appeared in some of the major Japanese newspapers and trade journals. While the Japanese and American markets are indeed different, many of the worldwide policy decisions from the Japanese based companies come from Japan rather than the U.S.

In addition, something seems rotten in Denmark, Before CES Sanyo (Japan) and AT&T said they were seriously considering not making their own version of the 3DO.

At CES Trip Hawkins announced that both companies were going ahead with their versions of the systems.

Now, only one month later, our foreign correspondent in Japan faxed us this new article:

"Sanyo made it clear that it will freeze its plans to develop and manufacture its proprietary 3DO format player. Having exhibited a prototype of a 3DO format player at this year's Winter CES, it was believed certain that Sanyo would launch its own hardware. However its plans have now been shelved Sanyo claims that because of the pricing

of hardware, it would be difficult to hope for

rapid proliferation of 3DO.

In fact, America's AT&T, which was also expected to manufacture and sell its own 3DO format player, has abandoned development in-house and switched to OEM sales of Matsushita Electric hardware. [i.e. Matsushita's product will be sold under the AT&T brand name.]

Sanyo claims that if it appears 3DO's market will expand, it will again consider sales of its own [3DO] products."

The above article was run in the Japanese magazine—Dengeki Super Famicom, Issue No. 2.

Who do you believe? Trip Hawkins who says everything is cool, or the Japanese who apparently have cold feet about 3DO.

Was our last month's article wrong? No. The Japanese are very careful about where they invest their time and money and Sanyo's most recent announcement confirms their pre-CES 'wait and see" attitude.

In checking the accuracy of our correspondent's information we called both Sanyo and AT&T to check up on Trip's statement.

Sanyo sent us a copy of the press release they issued on January 6, 1994 (the first day of CES) that states "...[Sanyo is] continuing to study (the] potential for the product in the U.S." Hmmm. Not quite as definite as Trip's statement. Looks like the system is still on hold.

AT&T's Steve Rand confirmed that "AT&T is still negotiating its sourcing arrangements for a 3DO Interactive Multiplayer." That is, AT&T will not make their own system but instead, they will put their name on someone elses (who else but

Matsushita/ Panasonic?) system.

That's the story. Bottom line, Sanyo is on indefinite hold and AT&T is not going to do their own system. Of course, like anything else in this industry, this information could change tomorrow. We'll keep you posted as to any updates.)

LETTER OF THE MONTH

If you think you have what it takes to contribute to society, go write to Newsweek. If, however, you have a thought or opinion that fellow gamers would particularly find crazy, we'd love to immortalize you with a special edition EGM T-shirt proclaiming your fondness of and psychosis to video games.

Dear EGM:

My name is Big Rex.

I am a vicious dinosaur.

I am green and yellow.

I live in a spaceship.

I think I am related to Barney because we both sell for about \$30.00. Anyway, I really like peanut butter. What's your

So long, (Grrrr!) Big Rex

P.S. I LOVE YOU!

P.P.S. I personally like chair number D.

Ha-ha Big Rex, we know you're Really Robin McGowen. (It's on the envelope!) Thanks for the letter, we got a few laughs. Personally we pick chair G (the lamp). Anyway, you qualify as a true psycho. Give my regards to Barney.

With more characters and moves, World Heroes 2 Jet is on the way.

I was wondering if there are any more Neo*Geo fighting carts on the way? After all, it is the fighting game' system. How about a World Heroes 3? Or how about a new Fatal Fury? Let's not forget Shodown either! I already know about Art of Fighting 2, but I want more.

David Spencer Springfield, IL

(Ed. SNK's latest fighting games have really gained popularity, especially Samurai Shodown. That's why we're happy to announce that Takara will be releasing Samurai Shodown for the Super NES. While no release date was set, you can bet we'll be looking forward to this one. As for World Heroes 2, no one has officially picked this title up for a 16-Bit release, (though WH 2 has come out for the Super CD-ROM in Japan.) But anything is possible, especially if all you fighting gurus have your way. Also, you might want to check out the Arcade Action section for a first glimpse at World Heroes 2 Jet. It's the latest fighting cart in the series. It's done similarly to Fatal Fury Special, As to another Samurai Shodown ... only time will tell but they are certainly in our favor.)

NEW GAMES ARE NO FUN

What's the deal in video game land? Everyone in the industry is hung up on the capabilities and special tricks of systems while the development of games is ignored. At home, between my brothers and me, we have a Genesis, a Sega CD, two Super NESes, two NESes, two GameBoys, a Lynx and a TurboGrafx 16. At college, I was only allowed to bring my NES, since by brothers own all the other systems. My point is, I have more fun playing my old Slalom and Super Mario games here at college than I do with all the sophisticated equipment at home. When I do go home. I make a break for the GameBoy and play the new Zelda, Metroid and Final Fantasy games, When I go to the malls and see the 3DO and CD-i on display, I am impressed by the capabilities, but not the games. They are simply not as fun to play as they are to watch. I am almost looking forward to another market collapse so that another system like the NES will appear and remain simple and play games that are just plain fun. Improved graphics, sound and capabilities are important and exciting. But if overall quality and capability are sacrificed, what's the point?

> Jonathan Muszynski Marlboro, VT

Have any of you out there felt that your games are more work than fun? It might just be me, but I long for the days of the old Atari 2600. Back then games were fun to play. We weren't concerned with 'beating' a game. We played to see how long we could last or how many points we could score. You just don't see that any more. Graphics are a nice touch, but they don't make a game. A good example is with the full-motion video. It just doesn't have the interaction that I like, It may be fine for some, but I think we should trying getting back to the basics.

Andrew Stavens Orlando, FL

(Ed. Your point may be a bit one-sided about games not being much fun anymore. Role-playing games still offer the best bang-for-the-buck since many cannot be beaten in two sittings. Shooters, on the other hand, have become quite boring except for a few nifty ideas thrown in to spice the game up like R-Type III.)

MK 2 ON JAGUAR?

I think fighting games have the best replay value and also are the most fun games to play. My question refers to the Jaquar. Are there any fighting games for it besides Kasumi Ninja? Also, does Atari or any of its licensees plan to gain the right to make Mortal Kombat and/or Mortal Kombat 2 and Super Street Fighter 2 for the Jaquar? Just imagine a perfect translation of Mortal Kombat 2 for less than 100 bucks. Just make sure all the gore is intact. Let me tell you. If I could play any of those games at home just like the arcades for a considerable less amount of money, I would be the first in line to buy a Jaguar system and I'm sure so would any other normal human being who has played any of those games at the arcades

Yuan Jiang Muncie, IL

(Ed. Any more fighting games for the Jaguar? Sorry, but Kasumi Ninja is the only one so far. It looks pretty impressive, but it isn't finished yet. The characters you see in the pictures are only placeholder graphics. The finished version will have digitized graphics similar to Mortal Kombat. And yes, there will be blood in this cart as well. As for MK 2, it seems highly unlikely, unless Acclaim becomes an Atari licensee, since Acclaim has first right of refusal for all Midway games.)

SCALING ON GENESIS?

When I heard Wolfenstein 3-D was coming home to the SNES, I was overjoyed. Then I found out that is was changed from the PC. Is it Nintendo's influence? It must be. My question is: Is it coming to the Genesis? Would it be intact?

Tommy Finn Seattle, WA

(Ed. Good news! Imagineer has announced that they are doing a Wolfenstein 3-D for the Genesis, and it's supposed to be just like the computer version! It's going to be roughly 10-16 Meg, with everything intact.)

Wolfenstein 3-D is already on the SNES, and on its way to the Genesis.

POSTCARD PARANDIA!

The next time your parents drag you to some lame roadside attraction, be sure to pick up some of the tackiest postcards and send 'em in.

To take the sting out of springing real money for an ugly postcard, Sega has volunteered to give the winners one of their new six-button controllers and a Game Gear Carry-All case! Keep your eyes open as ugly can now pay off!

This month's winners are some real dogs. If you think you've got what it takes to top these winners, then break a pen and send your postcards addressed to Interface: Letters to the Editor.

BEHIND THE SCREENS...

In your September issue (Volume 6. Issue 9) there was a Behind the Screens article that was an interview with Masava Hashimoto and Yuzo Koshiro and their efforts in the making of Enix's new title. ActRaiser 2. First of all, let me say that I love these interviews with the programmers because it gives us all an insight that we would not have without you guys. I really would love to see more of these articles explaining the inner workings of games. It is especially interesting to me because I wish to go into the field of game programming and design and particularly music/sound composition. That's why I enjoyed the interview with Koshiro, who I believe is one of the finest music programmers in the industry. I would really appreciate it if you could explain what goes into the musical score of a game. How do you get music saved on a keyboard to a SNES game? I need to know.

Colin Day Englewood, CO

(Fd. Behind the Screens interviews with famous players in the industry are always fun to do, but are also a lot of work as well. For instance, when setting up the interview with Yuzo Koshiro and Masaya Hashimoto, we had to go through a translator which then went to Yuzo and Masava over the phone! Lately on my many trips to California. I've been visiting the companies for interviews which became Special Features. In the future. we'll try to focus more on these subjects. As to your question on transferring keyboard music to cartridge, it would be best if we left the answer to the experts. But that's a subject for another issue...)

NINTENDO PULLS A FAST ONE!

What is the latest scoop on Nintendo's 64-Bit Project Reality? Although it sounds like a dream, there has to be more news on what they are doing. Was there a unit running at CES? Is anybody developing for it yet? What did Nintendo say about it at CES? Can they get it out by the Fall of 1995? Will it be a CD or cart machine? How does it compare with the Jag, or Saturn or Sony's machine? Finally, can Nintendo really sell it for \$250?

Bill Knotts St. Louis, MO (Ed. Lots of questions there Bill! Unfortunately there aren't any definite answers vet. Here's our best quess. It appears to be real hard to believe that anybody can bring out a CD machine for \$250 so for that price it has to be cart only They still claim that Fall of 95 is a real date but we'll see if they have a system at the Nintendo show. As to CES. Nintendo had some pretty impressive demos running. The 3-D polygon graphics blew away anything we've seen to date. Unfortunately when we lifted the table skirt and saw a million dollar SG system secretly running the demos we wern't quite as impressed. The Project ...ality (there is nothing Real yet) is just all smoke at the present time. They wouldn't even talk about it at the press meeting!)

We lifted up the table skirt to see what was driving the cool demos... an SG workstation!

A DISGRUNTLED SEGA FAN...

I just want to start out by saying your magazine is the best. However, I have to disagree with your ratings for the Genesis and Sega CD. You gave the Genesis 8.8.7.8 and the Sega CD 6,7,7,6. I don't think that is fair of you. Why? Well you gave the SNES all 9's and that machine (in my opinion) definitely isn't the best. Just because the SNES has more available colors and more on-screen colors available than the Genesis doesn't mean a damn thing. Everyone is always praising the Genesis for its spectacular speed. And with games like Aladdin and Mortal Kombat (and many others), the system has really taken off this year. I personally think the Genesis is a better machine.

Lastly, all this bureaucratic crap the government is doing with "sexual" and violent (bloody) games has gotten out of hand. I think all the publicity these games are getting (Night Trap and Mortal Kombat) will only drive more people to buy them to satisfy their curiosity. If that's what the government wants to do then fine, but let the 'mature' adolescent decide what games to play. I read somewhere that parents are worried their kids will attempt to do Fatality Moves. Then it is the parents' fault for teaching their children the difference between real and make believe.

Kyle Heon Acton, NE

(Ed. We all are entitled to our opinions Kyle. We respect yours, but our Review Crew felt that the SNES had a better year overall. When compared side-to-side, games like NBA Jam, and Street Fighter 2 appeared better on the SNES than their Genesis counterparts, and ... just as fast. Sure, a few games have a little slowdown, but doesn't the Genesis as well? We are not saving the Genesis is not a good system, but we felt is was not the best. Our feelings on the Sega CD were based on the games we had seen at the time. Still in its first generation, we didn't see any really good "knock-your-socksoff" titles. Now that Sonic CD has appeared, plus Tomcat Alley, Jurassic Park and Ground Zero. Texas, the system has become more viable. At the time of the reviews, we were not impressed by the full-motion video games, where we had limited interaction. Now, Sega and its licensees are breaking down the barriers with their next generation softs.

As for the government-I don't really like the idea of government attention. Word has it that Night Trap is going to be pulled from store shelves, and replaced by a milder version. I guess even mighty Sega is buckling under the pressure. More on this another time...)

GAME OF THE MONTH

Genesis Sega

Sonic 3

Action Release: Now Levels: N/A N/A Mea

ED SEMRAD

Sonic 3 is simply the perfect Sonic game. It beats out all the previous Sonics with outstanding graphios, more hidden items and new items like the many types of shields. While the music is not as good as the CD version (I'm not expecting it to be...) it's still really well done. The bonus rounds give the average player a fair chance this time, unlike those "tunnels" of part 2. It seems unlikely that Sega will be able to top this one.

DANVON CARPENTER

Sonic 3 completely blows away everything you've ever seen in an action game. This game improves upon the original tenfold! The different shields that can be used as weapons is a great touch and having an extra attack while jumping is wild. Of course, there are tons of secret passageways. excellent background detail, great music and a welcome game save feature. Can Sega do any better? It doesn't seem possible.

AL MANUEL

I actually like this game better than the CD version. The game seems to be a bit better in many areas. There are tons of awesome new zones filled with incredible colors I didn't know were possible with the Genesis. The added abilities of power-up shields make the game a total blast. Even though this isn't a CD game, the graphics and music are outstanding. This is the greatest Sonic adventure yet!

SUSHI-X

This one definitely tops any of the previous Sonic versions. The levels are as huge as always and there's still tons of hidden stuff. What make this a bit better was the cool bonus rounds, the new weapons and the five new split screen zones. This game is fun with a friend and has a ton of replay value. Great graphics and good sounds are Sonic's trademark and this cart packs all the old pizzas and more.

Super Pinball American Technos / Super NES

Super Pinball is probably the best looking home pinball game out there, but that's about it. The game play gets very repetitious and boring as things progress. Pinball fans, however, will want to take a look at it.

8 6 6 6 6 ED DANO AL SUSHI MIKI

Sengoku Data East / Super NES

This game has an interesting concept as you can change into different types of fighters, yet it just doesn't come together. The two-player simultaneous play is a plus, but the unintentional laughs (like the rooster noises) derail it.

8 7 7 7 7 ED DAND AL SUSHI MIKI

Riddick Bowe Boxing Extreme / Super NES

Quite simply, this is the best boxing game for the SNES out there. The punches of your player are incredibly easy to do and it controls like a dream. Perhaps the highlights are the "Come on and fight" taunts that drain opponents.

9 6 7 7 7 ED DAND AL SUSHI MIK **Metal Combat**

Super NES

Shooter Release: Now Levels: N/A N/A Meg

Nintendo

Nintendo has done it again. When they take their time, the games turn out very good. Metal Combat is no exception. This Super Soppe game (believe it or not) has technique and strategy. No longe can you just shoot at your enemy for must find weakness and use all sorts of shields and bombs. The graphics are good, and the two-player mode is a welcome feature. Wait till you see the last quy!

I've never really liked the Super Scope games, but this one comes pretty well. The game controls OK but being precise with the Super Scope Just Isn't so easy. The difficulty lisn't hard enough until the later level where it beginnes extremely frustrating. The enemies may be col but the whose concept gets old quickly. Nintendo usually doesn't disappoint me with their games, this one just sin't my favorite.

Nintendo never ceases to amaze. Like most of their games, Metal Combat comes through loaded with some increable graphics and coloratil backgrounds and characters. Hove all the cool mech designs that fight against you. The are tons more options. The best feature of the game is the Two-player togo where one player can actually use any of the on-screen enemies and fire at the Super Scope user. Great shooter!

The best thing about this game is the incredible Two-player Mode where one player can become the enemy. The giaphics and backgrounds are very colorful and the mech designs are great. I'm not a big fan of guns including the Scope, did rither use a controller for more precise feel; however, for a Super Scope game this is one of the best. Loaded with action and lots of options, it will keep you playing for a while.

Super NES Sunsoft

Pirates of Dark Water

Action Release: March

8 Meg

Levels: 8

Though the controls of this game are outstanding, a number of instant hit enemies constantly appear, like those weird dogs and this is very enroying. There's not enough diversity in the enemies, also. What makes this game good is the are and challenge to it. The stroote anni level is a nice touch. The graphics are good, and the ending is long. This game works well as a two-player game. Most impressive Sunsoft.

If side-scrolling beat-'em-ups are your type of games, then Pirates of Dark Water will keep you happy. The finee characters have a lot of score attacks to bash heads and the blocking ability comes in randy at times. The levels have good variety to them with items to be easily the background. The game also plays fast so you won't get bored quickly. Decent tunes help to round out this very fun and playable game.

The part I noticed first was the exceptional control the game has. Although each character possesses some devastating moves, most of them righting tactics are nothing new. The graphics are average and the music can get a bit annoying. My big beef is the cheap hits from detail from dogs and certain exembes that fly across the screen so fast, you can't help but get hit. Still, it's a decent game for fighting fans.

This is basically a Final Fight type of game with a pirate twist. There are some cool traps ad enemies to keep timeresting through the levels. The graphics are decent but not excellent. If prefer to see the characters a life larger and a few original type of play elements. The game controls great and thereface plenty of levels to keep you playing. A good game but it needs some new techniques to score higher.

Flashback

Action Release: 1st Qtr. '94

Levels: 6 16 Meg

U.S. Gold

Super NES

This is a great action/adventure cart unlike anything else. It has the same smooth animation that made the Genesla version so cool. The graphics appear to have been to ched up a bit. While it noves a bit slow at times, the awasome plot more than makes up for it may only peeve deals with the game being vague in what you're trying to do at times. If you like cyberpunk stuff, this is for you.

Flashback may be an old game, for Genesis owners anyway, but it's still fantastic nonetheless. Incredibly fealistic animation and superb sound effects really draw you into the game. Even though there is a faint of slowdown at times, Flashrack is a fast-paced game. The music is drastically improved over the Genesis version, too. The one drawback is that once you beat it, you always know how to beat it again.

Flashback is one incredible adventure game. This is everything the Genesis version is and more. The graphits are rich in color with some beautifully drawn backgrounds. Why do the cinemas slow down, gryway? While the pace can be slow at times, the tasks that you must accomplish turn this into givery involving action/adventure. I totally dig the smooth animation of the main guy. A must buy!

You have to check out the rich color and intense graphics of this game. Finally this game shows what the Genesis can really do graphically. Also the animation is near perfect. Some people may get bored with the adventure aspect that if youre into it, the game is interesting throughout. There are total of tough puzzles to solve and excellent backgrounds at every scene. Even if you're into the other genres I'd still get it.

MAJOR MIKE'S GAME ROUNDUP

Claymates

Interplay / Super NES
Finally, after a long time in development, it's here. Claymates is a cute side-scrolling action game that excels in graphics and hav-ing tons of hidden items is a real treat. Also, the many characters you can change into are a plus.

Leaend eika / Super NES

A good Golden Axe-ish swordand-sorcery game with very long levels and thousands of enemies. However, there is really not too much diversity which is important in games like this. Nice Bosses, though, especially the dragon.

F-117A Night Storm

Ugh! F-117A has a great idea but is cursed with a fatal flaw: The actual flying and combat are too choppy, resulting in delayed action. The cinemas and other sections are well done, but the heart of the game just isn't there.

GA Electronic Arts / Genesis

Lotus 2 is more of the same of the first Lotus game. One of the really nice features is the option to actually create your own race track. Otherwise, it is a standard racing game, with two player head-to-head racing.

Skitchin' MA-13 iic Arts / G

Skitchin' has a theme similar to Road Rash in that you fight and battle at high speeds. The graphics are nice and the game has tons of options (like the nice Twoplayer Mode), but play it once and you get the idea.

Genesis **Pro Moves Soccer** Release: Now Sports Levels: N/A 4 Mea

This is a good game of soccer. It's easy to learn and the voices are above average for the system. It would have been better if you could name your players as well as your team. The graphics are crisp and clear, but I found the players a tad too small. Pro Moves Soccer would be a good cart to pick up if you like soccer. There are lots of options, and plenty of ways to score. Overall I recommend it.

Soccer games are usually bland but Pro Moves Soccer was a riot. The play control, although a bit awkward at first, became much more natural feeling. The graphics are very clean and the sound is decent, but the voices sound a bit grungy. The computer offers a solid challenge but it's much better against another player, since the computer likes to cheat at times. Overall, this is one of the best soccer games out.

Please understand that I am not a big fan of sports video games. So, I pretty much won't like this one. On the plus side, I think the graphics are done well, although they are a bit grainy. I also thought the voices were done very well with the calls for many moves in the game. The game played fairly well. I just didn't like the low-scoring game. The game is pretty slow and boring. Soccer fans should look into this, though.

The overhead view is kind of refreshing for a change but the game just doesn't look sharp. The characters are also small and it's hard to make out some of the important action. I'm not a big fan of sports games and this one doesn't lure me in. The voices are surprisingly good, but the graphics need to be a bit more intense for my taste. However, the control works rather well and soccer fans will find it fun.

Levels: 5	8 Meg
RPG	Release: Now
Belle's	Quest
Genesis	Sunsoft

Belle's Quest is going to be a great game for young girls. It might also be a good RPG for young boys or inexperienced players. It has good graphics, especially in the backgrounds. The story is like a fairy tale, and its nice looking cinematic displays help round out this cart. The control of Belle surprised me as using a button is not what anybody would expect. Still, it wasn't hard to get used to. Not bad!

OK, role-playing games are what I truly enjoy and Belle's Quest isn't a bad effort. The storyline is cool and the graphics are really top-notch. Belle's animation when she walks is some of the best yet, even though she does move agonizingly slow. But what's with these 'temperary setbacks?' Can't Belle die? Anyway, it's a decent RPG for the younger crowd. Both boys and girls will enjoy it.

Although I like the animated movie. I guess you could say that I'm a little disappointed with Belle's Quest the video game. Yes, the graphics are very nice as is the sound, but the part about the game I didn't like the most was the awkward control of Belle. Using a button to duck may confuse some people. As a game for young girls add a couple of points to the rating. For average players, this doesn't cut it.

Nobody better call me a sissy but I really enjoyed the animated film. The game follows the movie in a more cinematic manner than action. Basically it plays like an adventure game with puzzles and mazes. The animation and graphics are good plus the music is decent and right out of the movie. think kids can get into it with the fun and simple bonus rounds. Hardcore players may dog it but it's got an audience.

Sega		
Jurassic Park		
Release: Now		
CD-ROM		

Jurassic Park makes good use of the CD's capabilities, but the effects of running down the road and through the cave look awfully cheesy. The backgrounds of the actual game are really good looking, with little touches in the background to add to the effect. The sound effects are really top notch, and enhance the effect of being there. The puzzles are good, but I wish there was more to interact with. It's a good game.

I just can't seem to get into this one. The idea is nice but the execution comes off more poorly than anticipated. The point and click interface is OK and the little educational scenes aren't bad either. The problem comes in that the game is simply way too easy. The soundtrack, however, is very good and really helps to set the mood through the game. JP offers some good thrills, but the fun wears off after a while.

This is one of those point and click games that I don't get into very much. I think those games should stay for the computer. Although there are some action sequences, I just found the pace of the game too slow. I do like the excellent mood-setting CD soundtrack. Lalso like the many areas in the park where players can get a small education on the various dinosaurs. A very nice touch to a decent game.

The point and click mode make it more of an adventure game, but the puzzles aren't very complex and the movement is a bit choppy. Its strong point is the video footage of the Jurassic Park complex and especially the dinosaurs. Fans of the movie will enjoy it a lot, but the average player may find it boring. The graphics are a bit grainy for video footage, but the sounds and sights are good for a CD game.

MAJOR MIKE'S GAME ROUNDUP

Bubble and Squeak Sunsoft / Genesis

This is a game geared more toward younger players. B&S requires more than just jumping and killing enemies—there is also teamwork and strategy involved. The graphics are also very nice including the multi-scrolling.

GA **Roar of the Beast** Sunsoft / Genesis

The second of the two Beauty and the Beast games. This one is geared for young boys but even considering the age group, it just doesn't control as well as it should. The graphics are above average and eye appealing.

Dragon's Revenge Tengen / Genesis

"I live!" This sequel to Dragon's Fury offers a completely different pinball board, and lots of new bonus rounds. Some of the graphics (of beautiful women) are also very well done. If you like pinball games, then...

MA-13

Prince of Persia Tenaen / Genesis

An excellent conversion of the classic action game. This one is a little grislier than the other home versions (remember, this is Genesis). Lots of strategy and technique will keep one playing for hours.

MA-13 Microcosm Psugnosis / Sega CD

This game's plot seems to be right out of the movie Fantastic Voyage. You battle it out inside someone's veins. This is a cool idea, but the game gets repetitious and boring. Sifting through the weapons is difficult.

5

Electronic Arts

Monster Manor

Action Release: Now Levels: 12 CD_ROM

This is one of those games you either like or hate. I like this game. Its first-person perspective is rendered really well. The ghosts and spitting things really gave me the greeps. I wish there could have been more furniture in the house and that perhaps some of the levels could have been less maze-like. It would add to the realism. It plays quite well (except for the occasional instant death). Overall, pretty good.

Monster Manor is a very cool 3DO game. While it bears a striking resemblance to many other first-person games, Monster Manor takes on a different flair. The scrolling is very smooth and the graphics aren't overly blocky up close. The music is truly spectacular and really gives you the creeps, especially the screams! The enemies are beautifully drawn and add to the creepiness only Monster Manor can deliver.

I thought this game would be a bore. Well, what do you know? This isn't bad at all. The graphics are great with all the dark detail of a horror film and the music is frightening as well. I loved the occasional screams. They sent chills down my spine. I just wish there was a way to run or move through the house a little faster. Turning your guy around is also a bit slow. A good buy to add to your collection.

If you like the Wolfinstien 3-D maze type of games, then you'll like this one. The ghouls and ghosts give you a creepy feel. The dark look and eerie sounds add to the haunting mayhem. It can get a bit redundant since there isn't a lot of items in the house, except monsters. The game play could use a little more control of the character, but the graphics and sounds will make this a pleasant haunting.

Atari

Raiden

Release: Now Shooter Levels: 8 N/A Meg

Raiden is one of the most intense arcade shooters around. While it has been done on every format. this is the best to date. Everything is here and this game just screams technique! Average players beware! Lightning-quick reflexes required otherwise you will die quickly. While not the best example of the Jag's capabilities, it is a major improvement over Trevor and overall an outstasning shooter.

Despite what my comrades say about this game, I think Raiden is an above average shooter. While it never got much attention from me in the arcades, Raiden does offer plenty of excitement, especially in the later levels. The music really shows what the Jaguar can do if given enough time. Plenty of power-ups, nice bombs and big Bosses add up to a fun time. Now, if we can only see more games like this.

I expected a lot more from a 64-Bit system. Although this is virtually identical to the arcade, I can't really say that I am crazy about it. Your ship moves around the screen too slowly, making it tough to dodge ships and their bullets. That's another thing. At times the bullets are hard to see, so you would get hit easily. About the only thing I did like was the sound and the different level music. Arcade fans should be pleased.

The good part is that this version is almost identical to the arcade game. The bad part is that it just isn't that good. The problem is the tons of bullets that cover the screen and their color that blend into the background. This gets very frustrating at times and takes away from the enjoyment. Also the ship moves too slow to do any major maneuvering. It looks decent but even the graphics could be better for a 64-Bit.

Kether

CD-i

Action Release: Now Levels: N/A CD_ROM

Kether is a strange title indeed. It has a number of different games in it. The flying sequence controls was interesting, and the 'Simon says' puzzle sequence was a surprise. The mazes are pretty neat though. This game's graphics look great, especially while flying. The storyline is interesting, and it's non-linear leading to longer game play. If you have a CD-i, this game will interest you. It's that good.

Well ... it's different alright. Kether is one of those bizarre titles you won't forget after playing. The shooter sequences are the most breathtaking, with fantastic background visuals. The 3-D maze game is OK, but the concentration-type game really grates you after awhile. However, the combination of all these games is a neat idea. The CD-i hasn't had its day yet but games like this make it a standout.

I really don't know what to make of this game. Just what kind of game is Kether, anyway? It's a shooter. It's a puzzle game. It's a role-playing game. It's many different things It's good from a variety of standpoints. But I just wished it stayed in only one category! I feel the graphics are probably the best I have ever seen and the sound and music are topnotch, but the pace was too slow. It's just OK.

This game has many different aspects to it. At first it looks like a flight simulator, then it has a game of concentration, followed by a 3-D maze game. It's a rather weird combination, but I enjoyed the variety. Each game in itself isn't great but the collection keeps your interest even if it's to see what's next. It may seem a bit odd but the individual parts are fun to play. If you have a CD-i this may be your bag.

Are you a Sega-maniac? Or an SNES success? Would you rather duke it out in the street? Or at an altitude of 30,000 feet?

MAJOR MIKE'S GAME ROUNDUP

Dune CD Virgin / Sega CD

This is a pretty involving game, with some incredible digitized graphics taken right out of the movie. RPG fans will love this one, and the flying sequences are very well done. One of the better Seaa CD games.

Dino Dudes Atari / Jaguar

Dino Dudes is, essentially, Lemmings and Humans for the Jaguar. If you like strategy games of that type, then you'll probably find it of interest. The graphics are pretty good and the control is adequate. An OK game.

Caesar's World of Boxing Philips / Philips CD-i

Like most Philips CD-i games, CWOB has superb graphics. But in terms of an actual boxing match, it is better to call it a simulation where stratetgy is more important than punching speed, Easily the best boxing game yet!

Lemmings Atari / Lynx

Lemmings has always been a good strategy game, and the Lynx version coptinues the tradition. Some of the levels are huge, and there are lots of options like turning the music on and off and an essential Password feature.

Malibu Bikini Volleuball

Malibu Bikini Volleybal Atari / Lynx

MBV has very good graphics, but its main failing is its game play. Trying to hit the ball is quite a task, and you will probably end up missing it most of the time. There are plenty of options, including a Four-player Mode.

Alfred Chicken

Action Release: Now
Levels: 21 1 Meg

Alfred Chicken is the typical NES game. It has OK sound and graphics but neither are spectacular. The way the backgrounds are laid out it's hard to tell where you can step and, what's a pit. This got at any on the positive side. Jieged the large levels. For the younge player (the one who still player the NES) this is an OK cart. With so few new NES carts, you'd better get this one quick!

Alfred Chicken was OK on the Super NES, but the noticeable lack of quality graphics and sounds really but the score. The levels are still inge and have lots of places to fired, and explore, some hidden write some are right in front of you. The dontrol is also pretty good as far as action games are concerned, but Alfred Chicken can and will grow old once you've explored every hidden area.

I just got into video games when G-Bit systems were introduced. So it's very hard for me to be impressed with an 8-Bit game. Alfred Chicken has some OK graphics I guess with lots of places to go and explore. I also like the decent play control, something I tend to place much emphasis on I can say I'm crazy about the sound which I found to be a bit annoying. I you're happ with your 8-Bit, this is pretty good.

The 8-Bit is just about as dead as the GameBoy should be. There are some good games out there, but they are the exception rather than the use Attreet Chicken isn't a bad game, but on this platform it doesn't stand out from the rest. The graphics and sounds are decent for its system though. If you have to have a new NES cart, this one does have decent control and lots to explore but it's not my type.

Game Gear Codemasters

Micro Machines

Driving Release: Now
Levels: 27 2 Meg

Most people will probably skip over this cart, thinking that it's a loser. It's not. It is a fast-paced racer that has a bot of different tracks, venicles and drivers. You can keep playing this cart over and over, It even has parallax in some of fine tracks! like on the table. This game is above all fun. It suffers trom a bit of blurring sometimes, but not too much. This game is colorful and controls very well.

Fun, fun fun. Those are the three best words to describe Micro Machines. This game was good on the N. S. Genesis and yes, it's good on the Came Gear. The idea is so simple. Hace a little car around the track against computer or human entrolled opponents. The tracks are all unique with cute factings like table tops, garage floors and pool tables. If you're looking for a great game on the go, look no further.

This is one of the most entertaining portable games around. Hove the humorous and cute theme of the game. The praphics are above average and the sound is good, even though it's 8-Bit. The best part is you each choose from a large assortment of drivers and also choose them to be your opponents it you like. The many different cars and tracks are welcome. It gets a bit frustrating in some courses. A good game.

Like its 16-Bit counterpart, this game is an exceptional racing game with lots of humorous pieces. Lafort nonally like racers, but this one-ling game. The different tracks really make this a good racing game. Also the control is precise, and there are lots of drivers and whiches to choose from. With good graphics, decent sounds and interesting backgrounds, it is one racer that you will want to keep on playing.

Desert Strike

Action Release: Now

Lunx

Levels: N/A

Atari

N/A Mea

Desert Strike is a good game in itself. But when played on the small screen, it loses some of its effect. Your bullets are almost invisible, and telmip exactly what the enemias are is, pretty difficult. It controls well and the animation of the helicapter is good. Another down side is the lack of onserveen culors. They were too dark for me. At least it is something new, and Atari is on the right track with this popular title.

I must say that I was really looking forward to this one. Unfortunately, my hopes were let down. Although the Lynx screen is large, everything was so small it's hard to tell what you're shooting at. Going in a dark room helps, though The controls needed tightening up as it was too easy to fight the enopper instead of maneuvering it. The missions had variety to them and that adds up to some good fun.

I just couldn't get into this game. I found the controls awkward and hard to get used to. The graphlos were unimpressive and to top it off, your assult on the enemy is hindered because it was very difficult to see your shots. I will say that the inelection in sery smooth and the sound is OK if you can handle portable sound. The many missions are nice, prolonging its play value. Otherwise, this just isn't my thing.

This game is just too hard to see and play on the smaller screens. As a 16-Bit version there wastons of game injury and strategy but it loses its impact on the small screen. However, the animation and graphies are good enough to get by. The best point is that there are lots of missions to keep you busy 'as a porable game. It will take some time to get used to the controls but fans of the helicopter game can get into it.

...Open the blast doors, my loyal Q-followers, for the straight scoop from behind the lines of the recent CES! This report is quake-proof gamers, and is guaranteed to make you play smarter or your pizza's free! It was a glorious show my Q-friends, with yours truly making the rounds, hitting the parties, and getting the scoops on the hottest softs and gamewares headed for store shelves. While you can turn to the CES preview guide in this issue of EGM for the straight scoop on what scorched the show floor and what fell flat. Only on this page can you get the behind-the-scenes info on what was really popping at the greatest show on Earth...We start at the 3DO booth, where the Tripster was dodging criticism of his mega machine dream and the mixed results it was greeted with during the holiday season. The world's white shirt in the spotlight met his detractors head-on with the announcement that 3DO will likely go ahead with a PC version of their powerful game board. Alright, alright, I know I told you this about a year ago, but the Q is behind this move 100%. Although it takes it out of the video game realm, the PC market is probably the last hope this super system has for finding financial nirvana...Look for Beavis and Butt-head to make their way to a gaming platform near you. The Q-Mann has learned that Viacom is positioning their dysfunctional duo as the flagship license for their fleddling entree into the world of interactive media. Being interactive is cool, heh, heh, heh...

...Capcom is going for the Quartermann record for most procrastinating company on the face of the planet. How many Street Fighter 2 games are you guys going to make before you release Street Fighter 3? Are you stopped up or what? The Q-Minator has learned from sources inside Capcom that yet another version of SF2 will hit shores at the ACME coin-op show out in the windy city headquarters of EGM! At least the big-wigs gave it a creative name: Super Street Fighter 2 Turbo - whoopie! Don't even try the update path on this one guys, we want to see a new game! Just pass the Ex-Lax and get on with itt...When you whink of Capcom, what game pops to mind? OK, besides SF2. Well, if you said Mega Man then you're no longer correct, since beginning with chapter six of this on-going saga the U.S. marketing will come to store shelves courtesy of Nintendo...Best fanzine? You guys are a riot...One thing the CES wasn't short on was big name pop culture stars making guest appearances. In addition to movie making powerhouse Steven Spielberg, nearly every comic company had reps peddling their titles for possible immortalization in pixels...

...Look for the Sony PS-X to make a bigger splash than anyone thought it might, courtesy of 3DO! Seems the honchos at Sony central in Japan were pleased with the results of their R&D dough, but were concerned that the market wouldn't be ready for a device that could do more than just play games. Now that 3DO has softened us consumers up, Sony feels that their product is superior and can easily move in for the kill!...First word of warning on the Nintendo/SGI partnership - the game developers are dying! Sure the SGI (even the stripped down Nintendo version will eventually sell) can produce some killer graphics, but there's only a handful of graphics gurus capable of pushing the machines to the limit. Why not hire them, you ask? Because they all work for SGI! Seriously, SGI and other independent outfits are trying to bring game developers up to speed, but the complexity of the development systems are leaving most people scrambling to get something on the screen by the time the hardware hits next year...lt's official: Sculptured Software will be doing the honors for the Super NES version of Mortal Kombat 2 for Acclaim. Get ready to be propelled into a world of sweat...

...Seems 20th Century Fox can't make up their minds when it comes to whether or not to take the plunge into the gaming arena. The Q overheard some of the Fox execs mulling over the plans during some fine CES dining of six buck dogs. As Al Pacino would say, "When in doubt...". The question I want answered is exactly how many paisley sweaters does this guy actually have?... Another company looking to delve deeper into the world of self-publishing their characters is Marvel Entertainment. Although they're quite content with their current arrangements, Marvel's chief is looking for ways to expand the reach of their super heroes. It also doesn't hurt that James Cameron is laboring on a Spider-ham movie as we speak... Speaking of comic characters coming to life on video screens, it looks like TH-Q and Malibu are parting ways. Even though the early revs of the Prime video game adaptation are truly hot, and the game is nearly done, the big boys of TH-Q have nixed their deal to concentrate on other projects... That just about wraps it up for this ish, my Quarter-friends. Remember to turn to the Q for all your gaming info, kiddies, because this is the only place the gossip stays crunchy - even in milkl...

SEGA INTROS Modular FX Cart!

Sources at Sega have informed EGM that they are going to be bringing out a new 'modular' cartridge this June. This new cartridge configuration will be done in order to reduce the 'sticker shock' that is typical of cartridges that contain special effects chips. In this instance, the new modular cart will be used specifically for Sega's new line of SVP (Sega's version of Nintendo's FX chip) games.

An example of 'sticker shock' is the \$99.95 suggested retail price of their heavy memory plus SVP chip game—Virtua Racing.

What the consumer will do is purchase a mini-cartridge for \$40. This mini-cart will contain Sega's SVP chip. As new SVP chip games become available, players will only have to purchase the new 'plug-in' game cartridges.

These 'plug-in' cartridges will then be inserted into the previously purchased SVP mini-cartridge and the combined unit will then plug into the Genesis.

Note: Virtua Racing, since it is coming out this spring, will not be made in a mini-cart format.

The obvious advantage is that game players will only have to purchase the SVP chip cart once. Instead of SVP carts costing about \$100 for every game, the cost will be reduced to about \$50.

A secondary advantage is that you'll quickly see tons of SVP games. Since Sega's third-party licensees will not have to absorb the heavy cost of the specialty chip, they all are eager to start producing polygon games.

GAME GENIE 2 SLATED FOR 1995!

Ever since EGM broke the news about a Game Genie 2 being in development back in the November issue, one of the hottest topics of discussion was this top secret sequel cheat cart.

During CES our editors again did some investigative reporting and came back with an update to the earlier story.

In a breakfast meeting with the wizards at Codemasters, EGM learned that the Game Genie 2 is "almost finished" and that negotiations with Galoob (the company that will market and distribute the Game Genie 2 here in America) are already underway. Final debugging of the unit will take place this summer and should be available this fall.

Next our sleuths talked to the officials at Galoob who were also at the Winter CES. The story, from the Galoob side, was a bit different. Yes, Galoob did have discussions with Codemasters about the Game Genie 2; however, Galoob was not as optimistic about a finished product being available to them by summer. At best, Galoob stated that they hoped to see something late in 1994 and if that was the case, the Game Genie 2 would have its debut sometime in 1995.

The Game Genie 2 will be different from the original Game Genie in the fact that players will be able to obtain their own codes by entering certain introductory parameters and then just playing the game.

Codemasters also confirmed that a Sega CD Game Genie is nearing completion and could be available late in 1994.

TRIAX TO RELEASE 3-D CONTROLLER!

Triax introduces a joystick that promises to be a new generation in joysticks with the new "Multi-Function" Controller. This peripheral can move on-screen objects at variable speeds in any direction, from the background to foreground and create 3-D action.

For example, in a football game a running back can move in literally unlimited directions, not just the standard eight, cutting at any angle he wants. The variable speed control also allows an on-screen character to run slower or faster than other players and literally run rings around them.

Several companies are already supporting the capabilities of the new controller including: U.S. Gold, Ocean, Electronic Arts, SunSoft, Virgin,

Tengen, Interplay, Namco and others. In addition, the joystick is fully programmable and is equipped with a multi-function turbo. It is also Genesis and Super NES compatible.

The joystick costs \$49.95. For more information, write to Triax Technologies, 11 Computer Drive, West Albany, NY, 12205.

The new Triax controller can move screen objects at various speeds.

THE SEGA SATURN SYSTEM SHOWN AT THE 1994 WINTER CES!

A glimpse of the finished product: the 32-Bit Sega Saturn system as shown at the 1994 Consumer Electronics Show...

THE 32-BIT SATURN HOME GAME SYSTEM

...and the rough sketch of the system as it appeared in EGM months ago. Pretty close, huh?

Sega is slowly going to the next level with its latest home game system peripheral—the 32-Bit Saturn system. Named the "Saturn" by Sega of America's President, Tom Kalinske, this system will sport superior graphics and will hopefully set a new standard for the home video game industry.

Some of the games previewed for the system at the 1994 Consumer

A glimpse of what the new Sega system may offer to gamers.

Electronics Show were Virtua Fighters and the racing game Daylona along with quick clips of other virtua reality type games. The Saturn runs rings around the competition with a total of either 1,024 or 2,048 colors. Other major home systems hardly compare. The Super Nintendo and DUO systems each have 256 colors. The Sega Genesis and Sega CD systems each have 64 colors on screen.

The main processor of the Saturn is a customized 68030 unit developed by Sega and Hitachi and can work from 18 to 24MHz and can rip through the 32-Bit hardware.

In terms of speed, the Saturn will have a clock speed somewhere between 18 to 24 MHz, whereas the competing systems have somewhat slower speeds. The Super NES System has 3.58 MHz, the Sega Genesis 7.6 MHz, the Sega CD 12.7 MHz and even

the powerful NEO•GEO system falls behind with 14MHz!

One of the biggest questions about the Saturn is will it be compatible with the previous Genesis and Sega CD systems? As of now, this question is unanswered; but in order to do so, the Saturn would have to use a series of

new chips specially constructed for the peripheral. However, the drawback is such chips would probably affect the price of the system which already is rumored to be in the range of ¥50,000 (about \$430 here in the States). However, the system may be compatible with several other systems under development, such as a CD-ROM drive!

There is no release date for the Saturn as of now, but the peripheral will probably be cartridge-based with the option for a CD-ROM system. Will the Sega Saturn be the next level for Sega? Stay tuned to EGM for more information on this innovative system

MONSTER MAULERS by Konami

Get ready to rock-literally! This stone Boss can be one tough cookie to beat!

Get ready for the arcade experience of a lifetime! Konami's Monster Maulers will undoubtedly be one of the most popular games of '94. This sidescrolling action/adventure game is a feast for the senses. and then some!

One of the first things you'll notice about Monster Maulers is the absolutely phenomenal graphics. Being that this game is made by a company like Konami. this is no big surprise. However, when you see the exciting (and sometimes aweinspiring) array of enemies, you're going to flip your wig! Let's see, there's a huge stone giant, a nasty Centaur, ugly dragons who

Use each character's special move at the right time to do the most damage.

are more than willing to have you for lunch and a disembodied brain that really keeps its eye on you! This motley ensemble of beasts is really something to see!

There are three characters to choose from each with unique abilities and special powers. Players can choose to play either a oneor two-player game. In the Two-

Player Mode, the odds are stacked in your favor, especially if you learn to work as a team. Believe me, any chances of improving your ability to survive will be very welcome! If it's been a long time since vou've really enjoyed a game, give Konami's Monster Maulers a couple of quarters-it's a guaranteed mind-blower!

Each consecutive area offers new and entirely unique enemies to battle.

Try to use a lot of teamwork in the Two-Player Mode to finish each stage.

Top-notch graphics and imaginative enemies make Monster Maulers fun!

You have only your speed and playing skills to save your life. Good luck!!

NEWS

Howdyl It's Terri Aki here with a load of news for you. I recently flew in to the States for the WCES to check up on what games actually made it to the U.S. I was pleasantly surprised by what I saw. Sonic Blastman 2 (shown a few issues back) was announced to be on its way, as was Super Bomberman 2 (more on it a couple pages from here). Some of the best news was that Kikikaikai 2 (Pocky & Rocky 2) was going to reach the States. You can be sure of seeing these in the Next Wave section really soon.

Anyway, back in Japan, the new Super Street Fighter 2 CD came out, so you can now rock to the four new stages—along with variations of the original tunes. The latest Godzilla flick also came out. Entitled Godzilla vs. Mecha-Godzilla, the special effects are great. These rubber monsters look better than ever. Even Rodan makes a guest appearance. As you could probably guess, a whole line of toys are making it to the shelves based on this film.

Things have gotten pretty quiet on the Mega Drive front for some reason. Perhaps the Saturn is closer than we think. Oh well, I'm babbling, so I'd better stop while I'm ahead.

Known in Japan as Kikikaikai 2. Pocky & Rocky 2 is the seguel to the great shooter that appeared last year. Unlike the first game, Sayo (Pocky) is accompanied by another character who serves as an option. At the start, Sayo can choose one of three characters as options: a raccoon (Rocky), a girl ninja or a powerful priest. Later, she can pick up four more optional characters including a scarecrow, a mole and even a robot. In Single Player Mode, the option runs on its own, shooting enemies and dodging shots automatically. Sayo can link up with an option for added powers, or even throw the option at the enemies. In the Two-Player Mode, the second person controls the option, but must stay close to Sayo.

Carrying on the original's wacky Oriental setting and unique game system that allows you to block enemy shots, this one is as fun as the first. Another winner by Natsume, it seems. It should come out here soon!

The world you adventure in is even bigger this time around.

One of your allies is a scarecrow who is talented in combat.

Like before, players can block enemy shots with their fans and tails.

There is a whole new cast to join the original two heroes.

INTERNATIONAL NEWS

Last year, Sega introduced the Lock On series of infrared pistols and head mount sensors for playing war games safely. The gun would shoot harmless infrared beams that travel a relatively long distance (enough to play in a school gym, for instance). When a beam strikes a sensor, it emits a sound and vibrates to inform the wearer he's been hit; therefore. according to game rules-dead. The system is less expensive and much safer than paint pellet guns which are commonly used for war games. Not only are paint pellets costly, but they hurt like the blazes when you get hit. The Lock-On system is clean and it also looks really cool.

The original Lock-On system quickly gained a strong following, especially in Hong Kong and South Korea where magazines began devoting whole sections on customizing guns for greater distance and accuracy. Taking note of the burgeoning craze. Sega has newly introduced the Lock-On Bazooka, a hefty unit that looks somewhat like the seemingly forgotten Menacer. The unit is compatible with the original system and provides a wider scope of shooting so it can take out several enemies with one shot. Can the Lock-On tank be all that far behind?

A British department store came out with easily the world's most expensive Game Gear for the '93 Christmas season. A pricey sum of £55,000 (about \$75,000) gets you a standard Game Gear unit that comes in an outrageous diamond-encrusted 18K gold case. The gold alone weighs 800 grams, well on the way to two full pounds. The case is fitted with 46 carats of diamonds on the cross key and other accents. Made by a company called David Morris International. this piece of lunacy is touted as "the ultimate present for the children of the super rich." Despite the ridiculous price tag, the unit doesn't come with any games, although batteries are supplied. Shin-chan is a kindergarten brat who stars in one of Japan's hottest TV anime series (it consistently scores viewer ratings of at least 20 percent). In a way he's a lot like Dennis the Menace, but with a lot more bite. For instance, his imitation of an elephant involves him dropping his shorts and drawing "eyes" about three inches below his belly button.

He's bringing his twisted humor to the Mega Drive in weird action stages. Unlike a lot of poor translations from hit cartoons, this one promises to capture all the charms of Shin-chan with plenty of cinemas and digitized speech. It's weird, but way cool.

The nuclear lizard king's adversary from last year's Godzilla Vs. Mothra movie will soon be available in Japan as a mondo disgusting radio controlled toy. Instead of the grown-up Mothra, this puppy will be the repulsive larva stage (a huge caterpillar, ugh!). Being fully motorized, the larva will inch itself forward in a realistic wobbly fashion, twitching its body from side to side. (That alone should be enough to quarantee your mom staying well clear of your room.) Even better, it can spray silk from its mouth just like in the movies. You can bet this won't be cheap-the two foot tall radio controlled Godzilla from Tokyo Marui in the same series clocks in at well over five hundred dollars. Of course, it might be a cheap investment considering the kinds of pranks you should be able to pull off using this truly repugnant toy. (How can you tell that I'm scared witless of all things gross and slimy?)

Hopefully there will be MechaGodzilla as well. Who knows? If Mothra shoots silk, will Mechagodzilla have lasers? I think this Godzilla stuff's getting out of hand. Onto the next subject...

How'd you like to have a remote controlled maggot? It even spits silk!

Gaw, the programming team responsible for the coolest Ranger X, is preparing this fantastic action RPG. The hero is a young warrior who must defeat a terrifying force of evil that plans to bring chaos and ruin to a world nearing its end. On his epic journey, the warrior is joined by animals that help him with magic spells and provide transportation to get by

With a huge world of swords and sorcery, it's a mystical story to explore in the classic Zelda style. This is the kind of game the Mega drive has needed for a long time. Let's hope Sega will bring it out here.

Animals will help you throughout the adventure with magic and other spells.

Once you start out on your quest there's no turning back. Are you ready?

Actually called Neo Nectaris in Japan, I'm giving the Americanized title so you wouldn't pass over this great game. Most of you remember Military Madness as one of the best war sims around. Well, this isn't a pure sequel. It's actually the original game plus some new maps at the end. In total, there are 24 field maps, 16 from the original and 8 new maps that are scorchingly tough. Once you've cleared all the maps, you can try again at a greater difficulty. Of course being on CD, Hudson has

added some wild stuff with stage cinemas and cool tunes. Besides the armored troops and mechs featured in the original, eight new units have been added to enhance a whole new level of strategy to your game. You'll need them to rid your enemies from the moon. Pray this comes to the Duo. It's worth playing at all costs.

Some of the battles might be familiar, but special features have been added.

Like before, careful management of the terrain is crucial to success.

After turning up two popular anime programs in Japan, the Bogard boys and company will be making their big screen debut this summer. Like the original Fatal Fury and FF2 animes, the movie version will have an entirely new story. (Of course, the plot will be designed to neatly dovetail with the earlier TV shows.) Although no details were given, bet on all the characters from FF Special to make cameo appearances at the very least. The movie version will be produced by the same director and character designer who made the TV anime specials, so the same level of quality is assured. The movie will be released in Japan in the summer of '94, just in time to go head-to-head against the Super Street Fighter 2 movie and anime. To put it another way, the two fighting carts will be battling it out at the arcades and at the movies. I can hardly wait for this film.

The Bogard boys and company make their debut on the big screen soon!

Wario's Forest

Super Famicom Puzzle

Feb. 19, '94

¥4.900

Wario, Mario's new nemesis, stars in this action puzzler that's in the vein of Tetris. Yoshi's Cookies and other similar titles. The object is simple, just line up monsters and bombs that drop out of the sky in lines of three to make them disappear. Instead of manipulating these objects as they fall, the trick is to move them around once they've reached the bottom. Whole rows or single objects can be moved as needed. It's even possible to kick unwanted pieces away. Monsters come in a variety of styles from easy to kill ones or ones that need to be hit twice. The best part about WF is that you can take on a friend to see who's better.

Wario's Forest is comparable to Tetris and is just as addicting!

The Two-Player Mode is a real treat with both players battling it out.

It can easily be said that the Star Trek universe is the most popular among all of the other sci-fi titles. Gene Roddenbery's creation has within it four different series-Star Trek, Star Trek: TNG, Deep Space Nine and the upcoming Voyager series. There have also been numerous movies made, all of which have attracted fans from near and far. Now this exciting universe is hitting the video game platform on many of the major systems, including the Super NES. Genesis and the 3DO. First off, Spectrum HoloByte will be producing their long-awaited version of Star Trek: TNG "Future's Past" utilizing popular themes of RPG, action and shooters to combine them within the Star Trek realm! The story behind this is the mystery to uncover the powerful device called the Derandomizer. However, the Romulans and Chodak species are already hunting down this ancient artifact. Sega of America will also be bringing this version over to the Genesis system, providing their user base with plenty of Star Trek to keep Trekkies happy. Spectrum HoloByte is also going to have a computer-generated title of Star Trek:TNG "A World For All Seasons" on the 3DO, Utilizing many different polygon 3-D effects, this title really looks hot. There have also been recent announcements of Star Trek: Deep Space Nine being released for the Sega Genesis and the Super Nintendo. Following in the footsteps of the immense success of the latest in the Star Trek series, this will also combine many previously seen genres into a world where strategy and logic will help prevent the fall of the United Federation of Planets! Also, be prepared for Interplay's Star Fleet Academy, The Starship Bridge Simulator. You must graduate at the top of your class, and master the Kobayashi Maru scenario involving a newly involved Klingon planet.

FOR MORE INFORMATION CALL:

ou can play as Ren, Tula or loz—all are on a quest to destroy Bloth, the evil alien pirate, and his crew of the Maelstrom. Bloth and his evil crew have brought mayhem to the peace-loving people of the planet Mer and Ren's home, Octopon. If Ren can collect the seven treasures of Rule, he can control the deadly Dark Water and send Bloth and the evil pirates on their way. If Bloth gets the treasure, then despair will fall upon the planet. This game is a Final Fight-type game and is a lot of fun. Use a sword and/or your bare hands to defeat the pirates in this original story.

The battle really heats up in Level 2 as more enemies come out and fight.

The Pirates of Dark Water

Level 1

Energy and point bags plus 1-Ups are found by breaking apart these statues.

Learn to use all your attacks in the early parts of the game.

If you're not careful, these rocks will ruin your day.

Try to block his swing and go for the kill.

You're treated to a preview of the Level 2 Boss.

Level 2

This is Konk, the Boss of this level, who is the same person you fought in Level 1—only with more energy and a little stronger. He is extremely quick and will kill you if you don't constantly watch him.

Watch out for his bite!

Yow! Look out for the big guy. He's got some secret fighting techniques.

Bosses

This guy uses a whip to grab you and do damage before you have time to respond.

These twin brothers will double team and throw you before you know it.

This is the coolest looking Boss and the best way to beat him is to stick and move.

THE GOOD

The ability to use swords instead of just your hands. The Bosses are really cool, too.

THE BAD

The enemies get repetitive after the first couple of levels.

THE UGLY

The screams and moans of the dying enemies who have lost their lives at your hands.

Character Profiles

Ren

Ren is a good all-around player. With medium strength and agility, he is a good choice for beginners. He attacks with his fists and his sword.

Ioz fights with his fists. He is very powerful, and can battle with the meanest of men. His only drawback i that he is a very slow mover.

loz is the strongest of the three. He does more damage than anyone, but he is very slow. Once you become familiar with his ways, he is a deadly ally.

Tula fights with her fixts and knife. She is somewhat weak but makes up for it with her blinding speed and her agility.

Tula is a lot of fun to use. She is very quick and can destroy most enemies with the blink of an eye. Her agility more than makes up for her lack of pure strength.

Earth, Wind, Water and Fire, There was a huge war among them. Wind won and brought peace to the world. But some are not happy with peace and seek to destroy it. Wald is out to destroy that peace by sending monsters with the ability to turn enemies into stone. Only one hero has not been captured and you must take him all over the world to free the others and restore peace to the land.

There is also a Versus Mode where up to four people can play. It resembles soccer in that you have to use the ball to score goals against your opponent.

fter the incredible success of last year's smash hit StarFox, Nintendo has unveiled their latest

FX Chip masterpiece. Stunt Race FX is the next step in a technological progression toward unparalleled realism in home video games.

Driven by a new and vastly improved chip called the FX2, Stunt Race FX is a sight to behold. The FX2 chip handles the graphic challenges presented to it by using the latest RISC technology. This architecture allows the chip to enhance

the graphical definition of the game in a way that until recently, was unheard of.

The Super FX chip has certainly come of age in the last year! In Stunt Race FX, a new chip, the Super FX2, nearly doubles the speed and power of the chip found in StarFox! The results are quite dramatic, to say the least.

Aside from the boost in speed, the FX2 chip also enhances over- all graphic definition by using advanced RISC (Reduced Instruction Set Computer) technology. Hopefully Nintendo will continue producing these fantastic FX carts!

THE GOOD

There are plenty of different techniques, which allow for good replay value. Very challenging!

THE BAD

The shooter levels are too easy, even for its targeted audience—the younger players.

THE UGLY

This game falls into the category of being so cute that the Boss doesn't even appear to be ugly.

Some of the power-ups are hidden, but they are well worth going after.

The pipes can be very dangerous. They are leaking radioactive waste!

Finally, you've made it to the lair of the evil Kat of Nine Tails, Good luck!

Like the CD, this version contains all the elements and graphics that made the game a hit. There are plenty of dungeons loaded with guards and dozens of traps. Each level is like a puzzle that has to be solved in order to escape.

The graphics, although already good, are enhanced with some incredible character animations. The movements of the hero as he runs, jumps, climbs and fights are very impressive.

THE GOOD

The character animation is very smooth and the overall adventure will keep you playing.

THE BAD

The sword fighting can be frustrating because there is a bit of a delay in the action.

THE UGLY

There are plenty of graphically horrifying death scenes that the Prince can get into.

This is the top floor of the Manor and the simplest floor. The Grim Reapers are the primary enemies here. There are some illusions like ghosts that appear momentarily and then disappear. They will do you no harm. Also keep an eye open for the Floating Heads. These will cause a lot of trouble on the later levels as they spit deadly green goo! They can take away a whole life.

The next floor down is the attic.
The enemies are the same as the preceding floors, except they are greater in number. Some rooms will have armies of Grim Reapers, and the floating heads spit more of their goo at you and move at faster speeds. Shoot the green goo to keep it from hitting you.

Take caution here and slowly enter each room by peeking around corners.

Rooms of Gloom:

A few floors down lie the Rooms of Gloom. There are new enemies this time, including ghosts. These spirits will rush you with knives. Once they pick up your trail, they will keep coming after you. he deadliest alien life forms in the galaxy are thrown together into the same space station and must fight it out to survive. Also thrown into the mix is a Colonial Marine! Alien vs. Predator is hitting the Jaguar and it offers a new perspective to the theme: A first-person view where one can play as either of the title characters, or go at it as a Colonial Marine. Each of the characters has his/her own weapon systems and strengths/weaknesses. For example, the Alien is very fast, but does not have the complex and powerful weapon systems of the other two fighters. The Colonial Marine must find ammunition for his weapons, but he can plug into any of the computer terminals located around the station. And the Predator has probably the most complex weapon systems of all in addition to heat-seeking vision.

FUEL AND AMMO:

As the Colonial Marine, you must pick up extra ammunition and fuel for the weapons you will use throughout the game.

OPEN DOORS:

There are several elevators and rooms you will need to use to inspect for items. Be careful when opening doors!

PLUG INTO THE COMPUTER AND FIGHT IT OUT:

SURVIVAL:

The Colonial Marine must use the computer terminal to get updates on the station's situation from time to time (A). Use the Predator's infrared vision to spot enemies (B). Blast the Predator before he cloaks himself (C). In the dark corners of the station, vou will find the Alien's eggs (D. Ugh, facehuggers!

THE ALIEN:

The deadly Alien is the fastest moving of the three characters in the game. It has three weapons of attack: a long tail to snap at enemies: smaller extendible iaws for lightning strikes to use on enemies at a distance; and its deadly claws with long nails to slice. The Alien has to keep watch for the Colonial Marine, and more importantly, its archenemy-The Predator! The Alien sees things in normal view and has the selection of only the three aforementioned weapons. The Alien has the advantage of not having to find extra ammo.

PREDATOR:

The Predator has some of the most complex weapons in the game! It has several weapon systems including: a razor-sharp throwable disc, a retractable hand knife, a guided shoulder laser and his power-fist. It also has several lines of sight including thermal heat-seeking vision, where anything living will show up in bright red. Its archenemy is the Alien, but the Colonial Marine is an almost equal match. In addition, it has a voice sampler to listen to its enemies' dialects as well as the ability to make itself invisible with a cloaking device.

COLONIAL MARINE:

The last warrior is the Colonial Marine, who, like the Predator, has a variety of weapons and items he needs to use. He also has computer skills which are incredibly useful on the many computer terminals located around the station. He is armed with a Pulse Rifle, Flame Thrower, Pistol and Knife. His enemies are the equally hated Predator and Alien, with the added menace of facehuggers pitted against him, too. He must constantly find ammunition located around the base to replenish his supply.

his game does not look very good at first glance. But once you play it, you'll be hooked. It is intense! The levels are great and the constant changing of cars adds to the increased difficulty. There are about 10 cars to choose from, including a monster truck which you get to drive on the Bonus Levels. The look and feel of each car is quite unique. The sports car is quick, but it is difficult to handle tight corners. The 4x4 is slow, but allows for much more control. The Two-Player Option is great when your buddy is around. You can also choose from 11 different characters. Rev it up!

If you come in first on every level, you get to try this Bonus Level for a free life.

AWESOME LEVELS!

This driveway has many oil spills. bolts and screws.

Play an unusual game of pool here. Watch your speed.

THE GOOD

This game is addicting. I found myself not wanting to put it down to write this article.

THE BAD

The screen is very small (being a GG) and moves too quickly. My eyes hurt when I was done.

THE UGLY

Watching your poor car fall off the table and the terrible sensation you get when you're about to lose.

Will You Accept the Challenge of a Jedi Knight?

Teach a gruesome ice beast a few

Pursued across the galaxy, you and your Rebel Forces now marshall new strength on the remote ice world of Hoth. Although tracked by probe droids, attacked by ice monsters, and confronted by an army of gigantic Imperial Walkers, you must not give in. You are the Alliance's only hope. Learn the ways of the Force, then test your skills in this fast-paced, action packed sequel to the hit game, Super Star Wars.

Alternate between sideways scrolling, dizzying Mode 7 flight sequences and first person cockpit views. Experience the richness of a 12-megabit, interactive Star Wars universe, loaded with new enemies, exciting dialogue, movie sound effects, cool vehicles, and intense 3-D space battles. Join Luke Skywalker, Han Solo and Chewbacca in a continuation of their epic action/adventure in Super Empire Strikes Back.

his is a really good translation of the arcade classic. Super Off Road is graphically fantastic and just plain fun to play. The purpose of the game is to try and place first in as many races as possible. While racing, you earn money to better your 4x4. Between races, you are given the option to buy items such as: nitros, engine (make the truck go faster), Accelerator box (make the car start from a dead stop quicker). Iries (make tighter turns) and shocks (keep the truck from bouncing as much). The more of these items you have on your truck, the better it will run allowing for more speed.

THE GOOD

The graphics in this game are exceptional. I also like the options to better your car.

THE BAD

The screen moves very slowly and it is sometimes hard to control the car properly.

THE UGLY

Having to start over from the beginning because you lost too many races.

SUPER

These are nitro boosters and money bags. Nitro is good for getting out of tight situations and blasting your way to victory. Money bags are bonuses you get after each race to buy enhancements and power-ups for your racing trucks.

Nitros are great for a big boost ahead of the pack.

Buy parts here to improve your car's performance.

Keep out of the water or you will lose!

This is where you start.
The better accelerator box you have, the quicker the start you'll get.

CD Projects' Storage System Makes Sense

ith their patented two-pocket double sleeves-one for the CD, one for the liner notes-and the ability to be used in either a home unit or a traveling case, CD

Projects' Roladisc system was the most ingenious CD storage unit at WCES.

Each CD has its own designated sleeve. The sleeve is fit with clasps on the bottom that enable it to be placed in a clipfile for easy access at home. In an instant, a CD can be popped out of the Roladisc. and placed in one of CD Projects' carrying cases, which vary in size from a 20 CD storage capacity to 100. The cases come in soft or hard shells.

A Flatter World of TV

anasonic brought the possibility of the hang-on-your-wall-TV one step closer when it debuted Flat Vision TV at WCES. The 14

inch diagonal TV measures less than four inches deep.

Unlike other flat screen TVs that use LCD or plasma display technology, the new Flat Vision TV employs innovative new "active beam matrix" technology to deliver a picture with bright, vivid colors and image definition normally associated with conventional CRT sets. It also yields a wider viewing angle and is less susceptible to wash out in bright light.

Active beam matrix technology is similar in principle to the cathode ray tube used in most of today's

TVs. In the new Flat Vision set, the picture is created through illumination of screen phosphors by electrons fired from a beam source. However, unlike a CRT. Flat Vision divides the screen into a matrix of

10.000 unit screens. A separate electron beam is used for each segment.

LOG Glitters at WCES

Sure it looks like an ordinary log, and it is. Nonetheless, it was the rage of WCES-and

the Las Vegas strip.

NOW! NOT AVAILABLE ANYWHERE - LOG! What rolls down stairs. Rolls over your neighbor's dog? What's great for a snack, And fits on your back? It's Log! Log! Log!

From Mario's Metropolis to Sonic's City, log was evident everywhere. A number of seminars extolled the virtues of log. while nine out of 10 conversations centered on log. When people weren't talking about it, body language

made it clear log wasn't far from their minds. The log phenomenon sparked industry observer Frank Kurtz to say, "Kids just love log. It's good to see that technology companies are finally recognizing the merits of said tree portion."

But with the coming age of the electronic superhighway, will log be rendered obsolete? "Gosh, no!" shouted Kurtz, "Because when you stop and think about it, you can't beat log for overall versatility."

Regardless of what the future holds for log, one thing is clear; it was a bona fide multimedia smash at the 1994 WCES.

Playmates Goes Video

laymates Toys Inc., maker of toy action figures, announced at WCES they are entering the video game business.

Perennial king of the action figure category with its Teenage Mutant Ninja Turtles and Star Trek: The **Next Generation lines,** Playmates previewed its first game titles for both the Super Nintendo and Genesis at WCES.

The company showcased two cartridge-based games scheduled for fall 1994

releases: Star Trek: Deep Space Nine and Exo-Squad, based on the Universal **Cartoon Network syndicat**ed series.

"Our expertise is marketing quality products to boys, as evidenced by our successes with the Teenage Mutant Ninja Turtles, Star Trek and Exo Squad action figure lines," noted Richard Sallis, president of Playmates Toys. "We believe many of the toy properties we acquire will also make excellent video game properties."

CULTURE SOURCE FOR EGM READERS

AT&T Edge 16 has Potential

s a sign of growing support, five major video game developers are demonstrating video games for the Edge 16 product by AT&T that will let remote users of Sega Genesis systems play games together while simultaneously talking to each other over standard phone lines.

GameTek, The ImagiNation Network, PF. Magic, Sega and U.S. Gold are the first developers to show games that take advantage of the Edge 16 modem device, which plugsinto the Genesis game slot and offers simultaneous voice and data capabilities made possible by AT&T's VoiceSpan technology. "Soon, everyone will be

playing games by phone-it's inevitable," said John Bermingham, AT&T **Consumer Products** vice president for the Advanced Communications Technologies Group. "The fun of having a conversation while playing a game together, regardless of distance, is now a reality. We expect a large number of leading third-party developers to take advantage of this technology before it hits store

More than a dozen entertainment companies have announced their support for the Edge 16 product,

shelves."

and are evaluating opportunities to produce compatible versions of their games. These companies include Acclaim, Crystal Dynamics, EA Sports, Microprose, Spectrum Holobyte, etc.

Ratings a Hot Topic at Show

s hot as any new game introduced at WCES was the topic of a rating system for video games.

After three separate meetings with the Better Business Bureau, the Software Publishers Association and the Motion Pictures Association of America, several video game hardware and software companies convened in an effort to come up with a feasible rating system for games. The group hopes to hammer out an agreement before the U.S.government intervenes and imposes its own designations.

Jack Heistand, Electronic Arts senior VP of Marketing is chairman of the committee which includes representatives from Acclaim, Atari, Nintendo, Philips, Sega and 3DO.

Interactive...Vest!?!

s the race for a piece of the virtual reality intensifies, Aura Systems staked its claim by introducing

one of the first VR peripherals designed specifically for the video game industry.

The Interactor virtual vest is worn over the upper torso and adds a sensation of feeling to the sight and sounds of video games.

"It's a revolutionary video

game accessory," said Aura Systems senior vice president Larry Shultz. "Players can feel everything from the boom of a hard-driving soundtrack to the thump of an uppercut to the jaw."

Interactor works by "listening" to any game system's audio output, triggering an Aura magnetic actuator within the vest's core, which in turn creates bodypulsing vibrations keyed to the on-screen action. Controls allow the output to be fine-tuned from a feather to intense pound-

Interactor is expected in retail outlets later this year with a suggested retail price under \$90.

It just ain't right...

Nobody's too sure who this character is, but he was spotted near the

MicroSoft booth reading the biggest and best video game mag. We think he might be a reincarnation of the dragon Grendel from the old Atari 2600 "Adventure" cartridge.

Not a Splendid Spring for Spidey

hat's right, Spider-Fans, Spidey might be looking at a bummer summer after he learns in next month's Amazing Spider-Man #388 about the truth behind his parent's murderers.

Hellbent on revenge. Spidey takes on more of a cave-skull-in-first-askquestions-later persona. The Web-Slinger's deep seeded rage touches off a four-part miniseries appropriately entitled Pursuit, in which he hunts down the people who killed his par-

Batman & Spawn to Team Up!!!

An all-time favorite teams up with comics' most popular contemporary hero when DC Comics Batman and Todd McFarlane's Spawn team up in Batman-Spawn: War Devil.

The special Prestige Format one-shot follows Spawn's visit to Gotham City, where he hopes to exercise the ghosts of his former life. The Caped Crusader, alarmed by the uninvited, undead guest, decides to look into this strange phenomenon. As the body counts rise, the Dark Knight's pursuit intensifies. But will the confrontation between Spawn and the Dark Knight result in the cataclysmic Devils War? Or will the two vigilantes reconcile their differences to save Spawn's soul and Batman's city.

Extreme Presses Fast Forward

The month of May heralds a bold, innovative move by Image Comics

when Bloodstrike. Brigade and Supreme jump to issue #25. That's right, the books will fast forward to issue #25.

"We lat Imagel are big fans of future books. No speculation is involved here-this is precisely where these books will be at this point in the future, all the way down to the letters' pages and the advertisements," says Extreme

editor Eric Stephenson, "In fact, clues were planted in both Youngblood #0 and Supreme #7 that initiated the story which unfolds in late '95."

The regular sequencing of these books will return to normal in June and will skip issue #25 when the appropriate time comes.

Battlestone a leader of Youngblood? An evil Supreme? If this sounds wild to you, check out these upcoming Image books.

Disney to Crank Up Animation Output

n an announcement that is good news for just about everybody, Buena Vista Television is cranking up its "Disney

ing up its "Disney
Afternoon" animated block
for the fall 1994 season.

The \$50 million dollar investment will bring "Disney's Aladdin" to the small screen in a 65 episode series as well as two new program show-cases—"Mogram and "Action Friday."

"With these two new creative arenas," said Gary Krisel, President, Walt Disney Television, Animation "we will present a fast-paced kick-off to start the week on Monday and an exciting, action-filled half-hour to end the week on Friday."

The Shnookums & Meat Funny Cartoon Show is the first series to debut under the "Monday Mania" umbrella, presenting a collection of three irreverent cartoon shorts in each weekly, half-four episode.

Premiering in September on "The Disney Afternoon" is *Disney's Aladdin* a new, Monday through Friday series that will re-create the wonder and adventure of Disney's 1992 box office blockbuster.

Young viewers will take a daily magic carpet ride to adventure with the brave and resourceful Aladdin, his spirited fiance' Jasmine, the zany, metamorphosing Genie of the Lamp and the obnoxious parrot lago. Aladdin is produced by Tad Stones and Alan Zaslove, who also worked on Darkwing Duck and features the voices of Scott Weinger (Aladdin), Linda Larkin (Jasmine), Dan Castellanetta-who is also the voice of Homer Simpson (Genie), and

Gilbert Gottfried reprises his role as the monkey lago.

The most intriguing of the new series will debut on "Action Friday" just prior to Halloween, 1994. Gargoyles is Walt Disney Television's first dramatic series and will employ new animation technologies, special effects and high quality art. The saga unfolds each Friday afternoon over an initial 13 episodes, within the half-hour preceding Disney's Aladdin.

Weaving together mystery, drama and suspense, Gargoyles introduces the audience to characters based on the grotesque, stone sentinels which adom European castles and cathedrals.

In the series, Gargoyles were once powerful creatures who came alive at sunset as the vigilant protectors of a medieval Scottish fortress. Led by Gargoyle Goliath, these fantastic creatures defeated all attackers until they were betrayed and placed under a sorcerer's spell.

Condemned to sleep through night and day for a millennium, the Gargoyles lay frozen in stone through the centuries, undisturbed even when shipped across the ocean and reinstated high atop one of New York's imposing skyscrap-

In modern-day
Manhattan, no one gives
these menacing statues a
passing glance ... until the
spell is broken. The
Gargoyles still sleep, stone
statues by day. But when
the sun goes down, they
awaken-powerful, majestic
heroes of the night, dedicated to protecting New
York City from modern-day
barbarians.

BEAUSE LOSING SUCISS

SUPER ADVANTAGE.

That "it's not whether you win or lose, it's how you play the game" stuff is a bunch of garbage.

That's why we've got two ways to keep you winning: the

age. it's no wonder they're the #1 enhanced

per second), hands-free AUTO TURBO and SLOW-MOTION CONTROL. With all these killer features and cool styling,
